Download and use marine aquarium 3 serial key free on your own responsibility. Carotid artery reconstruction in patients with maxillofacial gunshot wounds: results of 13 cases. Experience with vascular reconstruction in 13 patients with maxillofacial gunshot wounds of the carotid artery is presented. Six injuries were sustained from direct trauma, and seven were inflicted by a shotgun blast. All injuries were successfully treated by initial ligation of the carotid artery followed by repair of the artery and its branches. The technique and outcome of reconstruction are reviewed. The use of the hypoglossal artery was necessary to achieve vascular continuity in 11 of the 13 cases. The majority of these injuries were life-threatening and necessitated early operation. The importance of early recognition of the extent and timing of these injuries is emphasized. Q: SSL handshake failed with kafka-connect I am working with apache Kafka 1.0.1 and apache flink 1.1.0 (both the versions were working fine before). I am trying to connect a kafka connect connector to the kafka broker using ssl mode. I have my certificates and the zookeeper path setup correctly. And when I run kafka-connect locally with following command bin/connect-standalone --name connect1 --broker-list localhost:9093,localhost:9093 --topics myTopic --ssl-trust-store /home/flink/.kafka/server/truststore.jks --ssl-trust-store-password myKey --ssl-keystore-password myKey --ssl-key-password myKey --zookeeper localhost:2181 I am getting following error.

---

Caused by: javax.net.ssl.SSLHandshakeException: Handshake failed at  
com.ibm.ws.ssl.components.DeployedComponentsSSL.handleJSer
