Related Software FantaMorph is a morphing plugin for FantaMorph Deluxe Edition. It allows you to transform a video or a sequence of images between different morphs. It offers a whole set of options that allow you to customize the behavior of the software. For example, you can activate or disable a 3D aspect, you can add a transition or even freeze the shape of the object in the final version, etc. Morphing is a very powerful way of combining footage. Whether you're going to create a DIY movie or add unique effects to a corporate promo, you will need an arsenal of morphing software to achieve the results you need. Morphing can be seen as the combination of 2 or more images into one in such a way that the result looks like a single image. With it you are able to create impressive video effects which otherwise would be impossible to achieve. If you are planning to add something special to your project, then you should have a powerful morphing software. There are many morpher plugins available which can be used to create the necessary effects. You can use them to create impressive backgrounds or interesting overlays to add a unique twist to your project. If you don't know the morpher, then it's important that you learn before using it. This will help you to create the most suitable effects for your project. Often, you are required to make a quick video to promote a particular product or company. Or you might just need a simple slideshow for your family or friends. Regardless of the situation, it is important that you have the best tools to make the video. When it comes to morphing, Adobe After Effects and Adobe Premiere Pro are usually the best options. However, you can also use the FantaMorph Deluxe Edition software if you wish to create custom videos using the wide variety of morphing effects included in the program.

Write to Noah Rayman at noah.rayman@time.com.Q: Does a linear transformation have a unique algebraic representation as a matrix? If $T: V \to W$ is a linear transformation with a n-dimensional domain V and codomain W, is there a way to represent T as a matrix A of the form $[T]_{A}=\begin{bmatrix}T_1 & T_2 & \dots & T_n\end{bmatrix}$? If so, is there a unique way to do this? A: No. For example, $$ T:\mathbb R^2\to \mathbb R^2: \begin{bmatrix}x\\ y\end{bmatrix}\mapsto \begin{bmatrix}x+y\\ x-y\end{bmatrix} $$
