

EZ PC Cleaner X64

Are you tired of your Windows operating system being cluttered with unwanted Internet clutter? Does your Windows Operating System perform slow because of too many unnecessary files and registry entries? Are you tired of being bombarded by unwanted pop ups? EZ PC Cleaner is the simple, easy to use, intuitive, powerful software for you to remove unwanted Internet clutter. Simply launch it and specify your PC directories to clean. It will now automatically clean your Internet cache, browser history, Temporary Internet Files, Recent Document, Cookies, and more. It also will allow you to specify as many User Defined Directories as you want with the simple specification window. Its the fastest, easiest and effective way for you to remove Internet clutter, and give you back more performance, cleaner and fast operating system. How to Clean your Computer with EZ PC Cleaner: 1. Run EZ PC Cleaner 2. Start the "Clean My PC" dialog box by clicking on the button on the main window 3. Specify any of the categories to clean and press "Clean My PC" button 4. Wait for the computer to clean the specified category 5. Press the "Restore my PC" button to restore your computer to original condition A: Stardock CleanMyPC We have tested all the major PC Cleaner's. We found CleanMyPC the best. In a nutshell, CleanMyPC lets you clean up your PC. It removes unnecessary files and (if you wish) defragments your hard drive. It gives you a full graphical view of what is taking up space on your hard drive, which is something that most other cleaners don't provide. The CleanMyPC interface is intuitive and uses colours to describe the elements. Download it here: CleanMyPC In the related art, the technique of controlling a touch panel without using a physical button is known (see Patent Literature 1 and Patent Literature 2, for example). For example, Patent Literature 1 discloses a technique in which a display screen and a button that generates a click sound are provided separately, and the button is operated using a finger or the like, and the click sound is generated by a click sound generation portion provided in the button. Moreover, Patent Literature 2 discloses a technique in which the distance from a display screen of an electronic device is detected by an infrared sensor, and a button is operated in accordance with a distance that is detected, so that a click sound is generated.
