She said that she was “very surprised” that the court had ruled in favor of her husband. “I had believed that the court’s decision would be against me and I’m very happy with that,” she said. The lawsuit had been filed by Ram Jethmalani, a renowned lawyer and close aide of Mr. Modi’s. The couple had sought about Rs. 90 lakh as damages. During the court hearing, Mr. Modi’s lawyers argued that their client’s name, photographs and addresses were publicly available. They said that his case could not be used as an example of a woman’s harassment and sought to bar all the proceedings in the case. However, senior advocate Dushyant Dave argued that a political leader who has been criticized for his alleged misuse of power should not be able to use such a “cloak” to protect his reputation. “If a woman works in a public office, and if she is against the leader, should the leader be able to use the cloak of the office to harass her?,” he asked. D.A. Vachha, another senior lawyer involved in the case, said that if the judgment went against the complainant, “the entire system of law” would be put under question. “I have an apprehension that in the larger scheme of things, the decision of this case will affect the entire right of women to obtain justice,” he said. Mr. Modi’s supporters were celebrating on the streets of Ahmedabad, Mr. Vachha said, while the opposition parties and the Congress were trying to “establish a moral justification” for the decision. The decision is likely to add fuel to the ongoing debate about

In a speech at the Jaipur Literary Festival in January, he said that he would defend Mr. Modi against allegations of

Getting Feedback from a Page in DraftSight is now more fluid, allowing you to work interactively with that feedback to take advantage of new and existing design possibilities. Automatically highlight and view existing feedback in the modeling window as you import a new version of the drawing (video: 0:26 min.) Receive early warnings of large scale changes to your drawing, including changes with a result size >100px. Import OpenCL models from PDF and add them as new entities in your drawing without the need to open and save each individual document. (video: 2:29 min.) Automatically choose the optimum reference when updating a model. Automatic conversion of OpenCL models to native CUDA objects, enabling you to work with these models on systems running native CUDA rendering. (video: 1:32 min.) Add a new drawing by selecting an existing folder that can contain multiple files and drawings. (video: 1:08 min.) Create custom shared variables and references based on annotations in documents and add new ones on the fly in your drawing. Use Excel to create a list of variables you might need for your drawing, or quickly create reference sheets to include as part of a template document. (video: 0:53 min.) Save new reference sheets as HTML pages that can be shared with other users. Save, share and reuse individual annotation pages for your designs with the updated PaperMark-based PDF

technology. You can now insert and edit annotations directly in the PDF document, and manage them with the paper-based, Markup tool. Simplified Access to Annotations: Use the PaperMark interface to easily access annotation data. Use the PaperMark interface to quickly access annotation data. Add a grid to your drawings and store and reference your annotations with that grid. Import images into your drawing, no longer confined to single raster files. Create a new drawing based on the actual number of pages in a document. Draw a line based on the actual number of characters in a document. Graphing and Power Statistics: Use various graphing utilities to quickly generate curves, histograms, and more to discover optimal setup and modeling conditions for your drawings. Create an AutoCAD Histogram directly from a histogram in the paper document. Add an arbitrary number of
